### **Scheuten supplies special glass for Venlo city bridge**

**On Wednesday 2 May, Her Majesty the Queen opened the entirely renovated Maasbrug in Venlo. The glass for the railings has been developed and produced by Scheuten.**

The Maasbrug has a complete new appearance. On both sides of the Maasbrug, four monumental statues by the artist Shinkichi Tajiri will be unveiled. The bridge railings will be fitted with Multisafe Design, laminated glass consisting of extra clear toughened glass and seven specifically designed screen prints. These will be illuminated by watertight LED lighting from Lagotronics BV which has been installed in the railing of the bridge.

‘As a result of a screen print on extra clear glass patented by Lagotronics BV and specifically developed further by Scheuten, the light transmission is even better, which gives the print a special effect in the dark.’

The partnership with Lagotronics BV has made this a product for which we can definitely see possibilities for various other applications, both indoors and outdoors,’ explains Anna Teeuwen, Marketing & Sales Director of Scheuten Glas.

- END -

*Scheuten is a leading and fast growing manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten currently employs a staff of 1,200. Turnover for 2006 exceeded 200 million euros.*

*Scheuten continually invests in new developments. New innovative glass products are developed by combining knowledge from all its production facilities. Cooperation with leading universities and research institutes leads to sustainable, functional solutions in the fields of glass and solar technology.*
