

Venlo, July 2009

PRESS RELEASE

EGBM and Scheuten Solar jointly realize two 1 MWp projects in Italy

Scheuten Solar and EGBM, an installer of photovoltaic systems announce the signing of a contract for the supply of solar modules for two projects in Italy. The projects will be realized in Spello and Agello and will have a combined power of almost 2 MWp.

For Scheuten Solar it is the first time that the recently introduced high performance Multisol® module (P6-66) with a nominal peak power of 250 Wp will be installed on such scale. At this moment the excavation work is in full progress, and according to plan the first modules will be delivered in September. Per project Scheuten Solar will supply 3,915 solar modules with a power of almost 1 MWp.

“I am proud that just short after the introduction of our high performance module the first contract is already signed. This proves we have the right products for every project. Furthermore we are very pleased with working together with EGBM, a family business that will take very good care of the installation of our modules”, stated Evert Vlaswinkel, Chief Commercial Officer Scheuten Solar.

Nicola Stabile, Renewable Energy Quality Manager of EGBM: “EGBM believes it will be extremely important to strengthen the partnership with such a strong and trustworthy company, leader in innovation in solar energy. EGBM will be both the installer and the owner of the plants, therefore it has selected the company offering the best technologies on the market that will be granting better revenues in time.”

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1600 and achieved a turnover of 467 million euro in 2008.

Scheuten Solar is a global player in designing, manufacturing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.

EGBM S.r.l. works in plant design, specifically in the tertiary and high technology sector. Furthermore they build, restore and look after the maintenance of industrial, civil and high value real estate buildings. EGBM S.r.l. was founded in the sixties, starting in the electrical field and expanding into other parts of the market such as automation, cabling and networking on both regional and national territory. From the nineties, EGBM continued to grow and developed divisions specialized in industrial automation, software, networking, constructions as well as renewable energy, in particular photovoltaic and biomass. Following this new trend, in 2009 the company started a financing program dedicated exclusively to the “Green Economy”.
