

Venlo, August 2009

PRESS RELEASE

Scheuten Solar strengthens its presence in the Greek Market with 1 MW project

Scheuten Solar announces the start for the supply of Scheuten Multisol® modules for a 1 MWp project in Greece. Owner and operator of the project will be Ilioependytiki S.A., whereas Data Energy will undertake the installation of almost 6,000 Multisol PV panels. This project is presently one of the biggest in Greece and is located between Tripoli and Megalopolis in the southern part of the country.

For Scheuten Solar this is the second large project in Greece - after the 2 MWp project in Volos in 2008. In addition, Scheuten is involved in the realisation of many smaller scale projects in the country. From the beginning of 2008 when Scheuten entered the Greek market, it has achieved a significant market share making it one of the leading PV companies active in the country.

"I am proud of this success in the Greek market. This proves we have a strong organisation and network in a part of Europe with lots of potential. We are very pleased to be working together with DataEnergy, a reliable installer capable of providing investment company Ilioependytiki S.A. with both our PV panels and security for its long term Investment", stated Evert Vlaswinkel, Chief Commercial Officer Scheuten Solar.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1600 and achieved a turnover of 467 million euro in 2008.

Scheuten Solar is a global player in designing, manufacturing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.
