

## **PRESS RELEASE**

### **Scheuten formally opens division in United States**

Scheuten announces the formal opening of a new division to serve the growing United States market. The division, Scheuten Solar USA will be based in California and will provide the fast-growing market in the U.S. with glass and solar products.

“The growing interest in the United States for green building practices in is resulting in an increased demand for Scheutens experience and innovative new products in solar and glass. The high quality of the Scheuten Multisol® PV product and the functional beauty of the Optisol® glass product are specifically designed to meet this demand for clean solar power” according to Dave Johnson, President and CEO of Scheuten Solar USA.

Scheuten Solar USA will specialize in project development of clean and sustainable energy solutions. Scheuten is a leading and rapidly growing manufacturer of glass and solar systems, combining over 50 years of experience with innovative ideas to earn its reputation for quality and reliability. As a rapidly growing solar integrator in Europe, Asia, the Middle East and now North America, we specialize in project development, management and delivery. Guiding customers through analysis, feasibility, scoping, design, construction and commissioning we provide a single source for clean, renewable and sustainable solutions.

The future of architecture belongs to those that incorporate efficiency, functionality and renewable energy into their designs. We provide architects, developers and builders with innovative products that offer value propositions at attractive prices. From the functional and attractive Building Integrated Photo Voltaic glass Optisol® to the more traditional solar product, Multisol® Scheuten is there.

- END -

***Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of 1,500 and has a turnover of 360 million euros. Scheuten continually invests in new developments. New innovative glass products are developed by combining knowledge from all its production facilities. Cooperation with leading universities and research institutes leads to sustainable, functional solutions in the fields of glass and solar technology.***
