Scheuten moves to new head office

Scheuten has opened the doors of its new head office. The office provides space for nearly two hundred employees of Scheuten Solar and Glass. The new site in Venlo (NL) is fitted with a glass façade combined with more than 230 Optisol® solar panels. The office has been built on the site of the future Sunrise campus.

Scheuten Glas, Scheuten Solar and Scheuten Absoluut Glastechniek are represented in the new head office.

The reason for the move is the continuous growth that Scheuten has experienced in recent years, resulting in the existing offices becoming too small. The choice for the new site is a logical one: on the industrial estate in Blerick there are already a number of Scheuten Glas production sites, the production of Scheuten Solar glass-glass solar modules (Optisol®) and the Research & Development department.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1,600 and has achieved a turnover of 467 million euros in 2008.

Scheuten continually invests in new developments. New innovative glass products are developed by combining knowledge from all its production facilities. Cooperation with leading universities and research institutes leads to sustainable, functional solutions in the fields of glass and solar technology.
