Scheuten Solar USA receives \$ 3 million governmental funding for the realization of a 5 MW solar project

This week the state of Pennsylvania granted \$ 9.5 million of federal incentive funds to solar projects. The largest funding of \$ 3 million will go to Scheuten Solar USA Inc. for a PV-power plant in the state of Pennsylvania where Scheuten Solar will convert a brown field into a 5 MW solar field. The project will be completed by the end of 2010.

“Receiving this grant is a milestone for our office in the USA and gives us the opportunity to take further steps in the American market”, says Frans van den Heuvel, Chief Executive Officer.

This sizable, \$ 9,5 million investment, will provide jobs for 149 people, stimulates another \$ 46 million in private investments and, once completed, will generate enough electricity to power 1,200 homes annually, stated Mr. Edward G. Rendell, Governor of the state of Pennsylvania.
