## **PRESS RELEASE**

### **Scheuten Solar signs 2MW contract for two projects in Italy**

Scheuten Solar signs an EPC and Operations & Maintenance contract for two large PV projects in Italy. Italian companies Molino Casillo S.p.A. and Ascoenergy s.r.l. have teamed up as investors for both sustainable energy projects. One project consists of a ground based PV installation of 1 MWp, the other is a 950 kWp roof based PV system to be installed on two roofs near the production site of flour producer Molino Casillo S.p.A. The projects with a combined power of almost 2 MWp will be realized in southern Italy's Apulia region.

Work on both projects will start during the autumn of 2009. Completion is scheduled before the end of this year.

The green energy generated by the roof projects will mainly be consumed by the factories of Molino Casillo S.p.A. Upon finalization, Scheuten Solar assumes responsibility for operations and maintenance of both the free field and the roof projects. Ascoenergy s.r.l. and Molino Casillo S.p.A. will manage these and future PV projects as investor.

Scheuten Solar develops and realizes as EPC-contractor solar projects worldwide. "With these new projects we create an additional foot print in the Italian market. I look forward to complete the projects to the satisfaction of Molino Casillo S.p.A. and Ascoenergy s.r.l. A promising pipeline of MWp PV projects with these appreciated partners is already available", stated Evert Vlaswinkel, Chief Commercial Officer Scheuten Solar.
