PRESS RELEASE

Scheuten Solar presents product range 2010

Scheuten Solar, a global player in designing, manufacturing and applying photovoltaic solar modules adjusted its product range for 2010. By closely monitoring the market and communicating with customers Scheuten Solar adapts its modules of the Multisol® series to seamlessly fit actual requirements of module quality, application and design. In addition, for 2010 Scheuten Solar also developed a complete range of BIPV products to apply in facades, roofs and overheads. Together with the leading warranty conditions Scheuten Solar is ready for 2010.

Scheuten Solar did not only extend its product range to cover all possible applications. Quality and design were also further improved. For instance, a large part of the modules will be manufactured with a black frame and a black back foil as a default from 2010. In combination with the black foil on the rear, the black frame gives the photovoltaic systems a homogeneous appearance. The silver frame, with which the Multisol® modules used to be delivered as a default, will be used in combination with a white foil on the rear from this year.

With a product warranty of 10 years and higher warranted power values of 92% for 10 years and 83% for 25 years Scheuten Solar is leading in the photovoltaic industry. Together with the mentioned improvements for its product line Scheuten Solar is ready to build on its successes in 2009. "I'm very proud that we can offer optimal solutions for the whole spectrum of solar applications. The continuous improvement of our products guarantees top quality for our customers", stated Evert Vlaswinkel, Chief Commercial Officer Scheuten Solar.

- END -

Scheuten is a leading and fast growing international high volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo. Scheuten employs a staff of nearly 1600 and achieved a turnover of 467 million euro in 2008.

Scheuten Solar is a global player in designing, manufacturing and applying photovoltaic solar modules. Since Scheuten Solar was set up in 2000 it has evolved into a fully-grown organization boasting specialists in the fields of solar technology, manufacturing, project development and project realization. By managing every stage of the solar value chain Scheuten Solar guarantees the quality and performance of all products.
