**Scheuten Solar introduces unique portrait mounted roof-integrated PV-system**  
Latest PV solution will save up to 30% of the PV- systems' width

**Scheuten Solar 's latest solution: Multisol® Integra Vitro portrait, enables better matching to the roof form factors compared to landscape mounting. Scheuten Solar is the first PV module manufacturer offering this portrait flexibility for the Integra system, enabled by the unique robustness of the Vitro glass-glass laminate.**

Multisol® Integra Vitro is a universal roof-integrated solution, fit for nearly all pitched roofs. The Integra Vitro system is powered by Scheuten's unique glass-glass Multisol® Vitro laminate, featuring f | solarfloat HT glass with its unique stiffness and robustness. This explains Integra Vitro's ability to be mounted vertically (portrait mode) and replacing the roof tiles in part or completely. The high mechanical strength of the module boasts excellent wind and snow load resistance.

Multisol® Vitro & Integra Vitro modules feature an industry leading 30 years power output warranty and a 12 years product warranty, which are enabled by Vitro's laminate design and best-in-class f | solarfloat HT glass (produced by f | glass, a joint venture of Scheuten & Interpane).

"By listening to our customers and understanding the market needs, we decided to introduce this flexible and space saving roof-integrated solution", states Theodoor Scheerder, Director Sales & Marketing of Scheuten Solar. "Thanks to the excellent performance and quality of the Vitro laminate we are able to create this additional flexibility with the Multisol® Integra Vitro system, as first and sole manufacturer."

- END -

***Scheuten Solar is an international player in the field of the design, production and distribution of solar modules. Besides being a manufacturer of high-quality German-made products, we are professionals in the development and implementation of turnkey (BI)PV projects. We are dedicated to providing added value to our customers with powerful PV solutions. Our employees operate locally using high-quality products and solutions made for the future.***

***Scheuten Solar has over a decade of experience in the field of solar energy and forms part of the Scheuten group, an international high-volume manufacturer of total solutions in glass and solar energy systems with its head office in Venlo, the Netherlands. Scheuten employs in excess of 2,000 staff and achieved a turnover of over 500 million euro in 2010.***
