

Scheuten® decorative enamelled glass

# Colorsafe® Design

**A decorative solution for enclosed meeting room transparency. The glass toughening process also results in greater safety.**

**The glass shatters on breaking, thereby eliminating risk of injury.**

*Laboratorium Voor Architectuur, Middelburg*

**Scheuten**

**see it. feel it**

**With its over 50 years of experience, Scheuten Glas is a specialist in the field of high-performance glass products. Quick and efficient customer service is provided at factories and offices in the Netherlands, Belgium, Germany and France. Scheuten glass products play a major role in ensuring comfortable, exceptional and safe working and living. All products and services meet the highest safety and guaranteed quality requirements and standards, enabling you to build with confidence in the knowledge that you can rely on Scheuten Glas personnel and products.**

#### **Constructive collaboration**

You are able to rely on a specialist partner who thinks along the same practical lines as yourself. Architects, project developers, façade constructors, interior design experts, building contractors and housing corporations are guaranteed high-quality modern materials and services. Jointly with Scheuten, you are certain to come up with the best solution. Scheuten Glas Projecten can even undertake the entire project for you, including the installation.

#### **Varied product range**

Scheuten Glas stands for efficiency, product knowledge, innovation, reliability and wide product range. Quality is guaranteed throughout, from the float glass production stage to delivery of the end product. Research and Development experts are continuously looking to modernise processes and products. The comfort of a perfectly insulated house, the peace and quiet provided by an acoustically insulated area, safety in the event of a fire or threat, sun protection, exclusive design and solar power efficiency – all of these material advantages you can safely offer your customers.

#### **Coloursafe® Design concept**

The Scheuten Glas Coloursafe® Design concept covers decorative enamelled glass and glazing with an unlimited range of designs and prints applied at the company's own screen printing factory, using modern printing techniques. New designs are constantly being developed in consultation with architects. Coloursafe® Design is a quality product in the extensive Scheuten product range and many variations and combinations can be achieved.

Quality features of Coloursafe® Design:

- Customised designs available in very large dimensions
- Comprehensive product range in various standard decorative designs
- Safe and lasting UV-resistant product with high degree of colour retention

Discover the advantages of Coloursafe® Design for your projects...

**Scheuten Colorsafe® Design – the power of design !**

**Durability**

Colorsafe® Design can be used internally as decorative wall covering, partitions, doors or other conspicuous applications and externally as an architectural feature for external façades or balconies. Such special applications serve to enhance the special character of the overall building design.

**Pleasant experience**

Colorsafe® Design can be supplied in large dimensions and a wide range of designs for a variety of decorative and functional applications, providing the guarantee of a pleasant all-round experience.

**Easy installation**

Colorsafe® Design can be installed quickly and easily. Scheuten Glas experts are also on hand to provide practical help and advice on the best possible method of installation.

**Optimum efficiency**

Scheuten Glas own processing facilities, covering drilling and grinding and refinement techniques such as coating, toughening, laminating, screen printing and enamelling, ensure both reduced cost and functional creativity.

**The possibilities are legion**

You are entirely free to combine Colorsafe® Design with other specialist Scheuten Glas applications such as thermal insulation, solar control, soundproofing, safety, security and fire-resistance. Many variations and combinations are possible within this product range.

**Professional support**

Scheuten Glas has considerable experience in the development and manufacture of innovative glazing. Reliable advice and efficient delivery of materials ordered are guaranteed. In addition, you may also choose to have Scheuten Glas experts see to the installation. From the drawing board to the project completion stage, Scheuten Glas is a professional partner on whom you can rely.

**A Delft blue print of a flower vase used around the outside of a tearoom as a decorative feature.**

*Mockamore, Delft*

**Full cover, screen-printed façade panels used for this special project, combined so as to form the words 'VERKADE FABRIEK'.**

*Verkade Fabriek, 's-Hertogenbosch*

**The screen print design is based on the metal facing of the building, ensuring a harmonious effect.**

*Scheuten Glas, Hoorn*

**The glass sheets are installed in the same way as roof tiles. The assembly system is a company development.**

*Scheuten Glas, Hoorn*

The subtle line print ensures semi-transparent glazing with additional reflective effect. The rich colours enhance the character of the building.

*St. Antoniuscollege, Gouda*

A significant area of this façade is taken up by solar panels. Where these are not cost-effective, a design matching that used for the solar cells is screen printed onto the glass, thereby maintaining the unity of façade and glass roof.

*Schoonevaert, Haarlem*

For a complete overview of product performance, please refer to the Colorsafe® Design ID cards in this brochure.
