

Scheuten® laminated glass

Multisafe®

Scheuten

see it. feel it

With its over 50 years of experience, Scheuten Glas is a specialist in the field of high-performance glass products. Quick and efficient customer service is provided at factories and offices in the Netherlands, Belgium, Germany and France. Scheuten glass products play a major role in ensuring comfortable, exceptional and safe working and living. All products and services meet the highest safety and guaranteed quality requirements and standards, enabling you to build with confidence in the knowledge that you can rely on Scheuten Glas personnel and products.

Constructive collaboration

You are able to rely on a specialist partner who thinks along the same practical lines as yourself. Architects, project developers, façade constructors, interior design experts, building contractors and housing corporations are guaranteed high-quality modern materials and services. Jointly with Scheuten, you are certain to come up with the best solution. Scheuten Glas Projecten can even undertake the entire project for you, including the installation.

Varied product range

Scheuten Glas stands for efficiency, product knowledge, innovation, reliability and wide product range. Quality is guaranteed throughout, from the float glass production stage to delivery of the end product. Research and Development experts are continuously looking to modernise processes and products. The comfort of a perfectly insulated house, the peace and quiet provided by an acoustically insulated area, safety in the event of a fire or threat, sun protection, exclusive design and solar power efficiency – all of these material advantages you can safely offer your customers.

Multisafe® concept

The Scheuten Glas Multisafe® concept covers a system of laminated glass for safety, security, soundproofing, design and insulation purposes. The product range consists of various types and combinations of glass, bonded by one or more layers of foil. It provides protection against injury and falling through, breaking in or out, and resists gunfire and sound. In the event of breakage, the fragments will stick to an elastic PVB film, thereby ensuring safety and/or security. Multisafe® is a quality product in the extensive Scheuten product range, enabling many variations and combinations to be achieved.

Quality features of Multisafe®:

- Maximum protection against breaking in or out, gunfire and explosion
- Maximum protection against falling-through and injury
- Flexible application in all conceivable glass application and protection situations

Following extensive renovation, this block of flats now has a colourful fresh look thanks to Multisafe® Color: coloured foil incorporated in laminated safety glass.

De Trommel, Roermond

Scheuten Multisafe® – the power of safety !

Widely applicable

You are entirely free to combine Multisafe® with other specialist Scheuten Glas applications such as thermal insulation, solar control, soundproofing, safety and security, fire-resistance and design. Many variations and combinations are possible within this product range, which comprises:

Multisafe® | laminated glass

Multisafe® Color | laminated glass with coloured foil

Multiphon® | laminated glass with special soundproof foil

Multisafe® Design | laminated glass with screen-printed glass

Multisafe® Monumental | laminated glass with 'traditional' glass

Certified guarantee

Safety and security require a 100% guarantee. Multisafe® meets the strictest standards and clearly stated performance requirements for each type. Scheuten Glas provides a safe solution for every protection situation.

Optimum efficiency

Scheuten Glas has its own glass processing and refinement facilities providing for drilling and grinding, coating, toughening, laminating, screen printing and enamelling. Integrated activities result in cost reduction and functional creativity.

Professional support

Scheuten Glas has considerable experience in the development and manufacture of innovative glazing. Reliable advice and efficient delivery of materials ordered are guaranteed. In addition, you may also choose to have Scheuten Glas experts see to the installation. From the drawing board to the project completion stage, Scheuten Glas is a professional partner on whom you can rely.

Apartment complex given its own look through the use of safety glass and screen-printed lettering in balcony glazing.

Nesselande, Rotterdam

Balcony glazing with line pattern in housing project.

De Waranda, Bergen op Zoom

A customised reed stem motif used for the balcony glazing of these houses.

Le Carrefour, 's-Hertogenbosch

Multisafe® Design used in a customised pattern. The roof consists of laminated safety glass with screen-printed design. This design was also used on the insulating glass for the façade.

Eurocenter, Amsterdam

Multisafe® Monumental is single-laminate drawn glass. The characteristic appearance of the façade of monumental buildings remains intact, while the glazing offers protection and improves insulation value.

De Krayenhoff, Nijmegen

In single print, Multisafe® Design highlights every building.

Elsevier, Doetinchem
